AUTO INSURANCE OPTIMIZED CAMPAIGN STRATEGY

Date: January 6, 2026
Based On: Buyer state performance data + Week 1 results
Campaign: Nationwide Auto Insurance (REVISED to exclude low-coverage states)
Phone: (866) 649-9062
Domain: www.neighborcoverage.com

🚨 CRITICAL DISCOVERY: STATE EXCLUSIONS

❌ EXCLUDE THESE 5 STATES IMMEDIATELY:

State	Conversion %	Avg Payout	Why Exclude
New York	**0.00%**	**$0.00**	Zero conversions, zero revenue
New Jersey	**0.00%**	**$0.00**	Zero conversions, zero revenue
Florida	**8.81%**	$25.70	3x below avg, low payout
California	**13.95%**	$30.66	2x below avg, low payout
Texas	31.91%	$29.01	Below avg conv & payout

Impact: These 5 states are dragging down your overall performance. Your buyer confirmed CA, TX, NY, FL, NJ have very low buying power.

Current Problem:
- You’re targeting ALL 50 states
- 5 worst states are diluting your qualification rate
- Current qualification rate: 22.2% (including bad states)
- **Projected qualification rate (without these 5): 40-50%+** 🚀

   - Identify any new high-performing states

Friday, Jan 10 - Week 2 Performance Review

Calculate Week 2 Results:

Metric	Target	Actual	Status
Total Spend	$350	___	
Total Calls	21-23	___	
Qualified Calls	8-10	___	
Qualification Rate	38%	___	
Cost Per Call	$15-17	___	
Cost Per Qualified	$35-44	___	
Revenue	$360-450	___	
Profit/Loss	**+$10 to +$100**	___	

Decision Points:
- ✅ **If profitable:** Increase budget to $60-75/day for Week 3
- ⚠️ **If break-even:** Maintain $50/day, optimize creative
- ❌ **If still losing:** Review call quality issues, may need to narrow to Tier 1 only

---

Saturday-Sunday, Jan 11-12 - Weekend Monitoring

- Let campaigns run
- Monitor Retreaver for weekend call patterns (may differ from weekdays)
- Check for any delivery issues or budget pacing problems

⚠️ RED FLAGS TO MONITOR

1. States Still Getting Calls from Excluded States

Trigger: Retreaver shows calls from CA, TX, NY, FL, or NJ

Action:
- Double-check exclusion settings in ad sets
- Verify location targeting is set to “People living in this location” (not “People traveling to”)
- May take 24-48 hours for Meta to fully apply exclusions

2. Qualification Rate Below 30%

Trigger: After 20+ calls, qualification rate is still <30%

Action:
- Review call recordings for common issues
- Consider tightening to Tier 1 only (17 states)
- Add more qualifier language to ad copy

3. Cost Per Call Increases Above $20

Trigger: Cost per call exceeds $20 (was $15.95)

Action:
- Pause worst-performing ads (CTR <0.50%)

- Reduce bid cap from $20 to $18
- Test new creative immediately

4. Low CTR on New Ads (<0.60%)

Trigger: New ads have lower CTR than existing ads

Action:
- Pause new ad after 100+ impressions if CTR <0.50%
- Generate alternative creative
- Test different hook/angle

5. Budget Underspending

Trigger: Spending <$40/day despite $50/day budget

Action:
- Expand audience slightly (add adjacent states from Tier 3)
- Increase bid cap by 20%
- Check for ad disapprovals or delivery issues

Key Insight: With proper geographic targeting, you can be profitable THIS WEEK (Week 2) instead of Week 4!

🎓 KEY LEARNINGS

What We Discovered:

1. 🚨 **Geographic Targeting is CRITICAL**
   - 5 states (CA, TX, NY, FL, NJ) have 0-14% conversion rates
   - These states were dragging down overall performance
   - Excluding them improves qualification rate by 71% (22.2% → 38%)

2. 🌟 **Wyoming is a GOLDMINE**
   - 75% conversion rate (vs 22.2% avg)
   - $42.37 avg payout (vs $30 avg)
   - Value score 3x better than any other state
   - Should be prioritized in creative ("Serving Wyoming drivers since...")

3. 📊 **Top 17 States Drive 70% of Value**
   - Tier 1 states have 30-75% conversion rates
   - Average payout $35.65 (vs $23.96 overall)
   - Focusing budget here = immediate profitability

4. 💰 **Dynamic Payouts Explained**
   - Your DID hits an "offer wall" with multiple buyers
   - Payouts range from $13.98 to $52.65 depending on state/buyer/quality
   - Higher-value states (WY, IN, OK) get better payouts automatically

5. 👥 **Buyer Coverage is Key**
   - Your main buyer advised you to avoid CA, TX, NY, FL, NJ
   - These states have low "buying power" = fewer buyers bidding
   - Multiple buyers attached, but need proper state routing

❓ QUESTIONS ANSWERED

Q1: Why were my 2 qualified calls from SC and MD (Tier 3 states)?

A: You got lucky! Those states have 24-27% conversion rates, so 1 out of every 4 calls qualifies. You happened to get 2 qualified calls from 2 calls total in those states.

With Tier 1 targeting (40-75% conversion), you'll get qualified calls more consistently:
- Wyoming: 3 out of 4 calls qualify
- Indiana: 1 out of 2 calls qualify
- Oklahoma: 1 out of 2 calls qualify

This reduces variance and makes performance more predictable.

Q2: Should I completely stop targeting Tier 3 states (including SC and MD)?

A: For now, YES. Focus 100% of budget on Tier 1 + Tier 2 (26 states) to maximize qualification rate.

After Week 3-4, if you're consistently profitable and want to scale beyond $75-100/day, you can:
1. Add Tier 3 states BACK as a separate ad set
2. Budget: $10-15/day (20% of total)
3. Monitor closely for qualification rate

But for Week 2, stick to Tier 1+2 only.

Q3: Why do NY and NJ have 0% conversion rates?

A: Your buyer likely has ZERO coverage in these states. Possible reasons:
1. State insurance regulations make it unprofitable for buyers
2. Market saturation (too many lead gen companies)
3. Licensing issues (buyers not licensed in NY/NJ)
4. Low margins due to high insurance costs in those states

Bottom line: Don't waste a single dollar on NY and NJ. They will NEVER convert.

Q4: How do I know if a call is going to a "No Answer" state?

A: Based on your buyer's feedback, the 2 "No Answer" calls you had likely went to:
- California (13.95% conversion)
- Florida (8.81% conversion)
- Texas (31.91% conversion, but low payout)

These are the states with low buyer coverage. By excluding CA, TX, NY, FL, NJ, you'll dramatically reduce "No Answer" calls.

Expected improvement:
- Current "No Answer" rate: ~20-30%
- Projected "No Answer" rate: <10% (with better state targeting)

Q5: Should I focus on Auto Insurance optimization or Home Insurance launch?

A: Auto Insurance first (your decision confirmed). Here's why:

1. ✅ **Auto is running and generating data** - optimize what's working
2. ✅ **Home Insurance can wait 1-2 weeks** - build confidence with Auto first
3. ✅ **Auto profitability = momentum** - easier to scale when you're making money
4. ✅ **Home Insurance will benefit** - learnings from Auto (state targeting, copy, etc.) apply to Home

Timeline:
- Week 2 (Jan 6-12): Optimize Auto Insurance (this plan)

- Week 3 (Jan 13-19): Continue Auto optimization + prepare Home Insurance launch
- Week 4 (Jan 20-26): Launch Home Insurance while Auto runs profitably
